

# Aviation Wheel Chocks

- Impact-absorbing urethane is weather and abrasion resistant, and resistant to aircraft fuels, oils, and lubricants
- Eliminates Foreign Object Damage threats for aircraft—chocks will not rot, crack or splinter like wood
- Lightweight and easy to use with rope-lock system & optional rope carrying handle

## AC6800 for large and oversized aircraft

- Durable urethane will not rot, crack or splinter like wood
- High load-bearing capacity ideal for large and oversized private, commercial, cargo and military aircraft
- Optional anti-skid rubber pads for polished hangar floors
- Rope-lock system & optional rope carrying handle
- High-visibility yellow is easy to see
- Customize it—change color or add logo for your company brand

## Rope Lock System

The original military style chock-to-chock rope lock system allows a wheel chock to be temporarily and securely attached to the opposing wheel chock on the opposite side of the aircraft tire.

This chock-locking system ensures that wheel chocks remain firmly positioned against each side of the aircraft tire during engine test procedures.

## 20-inch Models
