

## Strength, durability and longevity to get through the harshest terrain

Whether on mud, sand, or swamp conditions, Mud-Traks will take you and your equipment where plywood can't. Designed with a solid fiberglass grid structure that channels tire load throughout the mat, Mud-Traks offers a more rigid surface that does not roll up or break.

- Peak strength of 63,000 psi—very rigid, ideal for heavy multi-wheeled equipment with rubber tires (no steel tracks)
- Super-strong, lightweight panels won't break or splinter
- Easily handled in the field, features rope handles for easy lifting
- Off-white color keeps mats cool in the heat so they will not damage lawns
- Textured on both sides for increased traction
- Does not conduct electricity—ideal for power line work
- One-year limited warranty

Surface tread	Grid tread (both sides)
Material	Fiberglass
Color options	Off white

Model	Description	Load capacity*	Thickness	Length	Width	Weight	Prop 65
