Description

Yellow Jacket® 5-channel ADA cable protectors have built-in ADA accessibility ramps to provide a safe crossing for vehicle and pedestrian traffic while protecting valuable electrical cables and hose lines. Because the ramps are built-in, there is no need for separate connectors.

Another unique feature of this product is that it interconnects directly to a 5-channel standard ramp Yellow Jacket® cable protector. This modular interlocking design is available in lightweight 18" sections and it includes a recessed carrying handle on the underside of the protector. Ideal for use in amusement parks, entertainment venues, sporting events, and most public, commercial, industrial, construction, and utility applications.

Custom cable protectors can be made with different colors and embossed logos. [Get a quote](#) with your specific requirements.
