## Description

---

Sold in pairs of male and female, Guard Dog's End Caps are designed to round off a 5-channel cable protection system. With all-weather polyurethane construction, they provide extra protection for both your cables/hoses and for the Dog Bone connectors. In addition, they reduce trip hazards at the end of each run. As with other Guard Dog protectors, the end caps feature Guard Dog's patented 5-bar tread surface, offering maximum traction for both pedestrian and vehicle traffic.

Whether you're running cables through an amusement park, powering heavy machinery in an industrial facility, setting up lighting for a concert or powering construction equipment, you can rely on Guard Dog to protect your cables.

Custom cable protectors can be made with different colors and embossed logos. [Get a quote with your specific requirements.](#)
