

# 20" Single SafeRay™ Hi Viz Aircraft Chock for Large To Oversized Aircraft with Locking Rope and Polyurethane Cable Handle, Green - AC6820-LR-CHFLG

## Product Images

## Short Description

---

- High-visibility fluorescent green urethane material with glow-in-the-dark handle reduces the risk of accidents
- Up to 50% lighter than rubber aircraft wheel chocks
- Lasts up to 5 times longer than rubber wheel chocks
- SafeRay™ Technology in fluorescent green provides the best day and night visibility
- Extended ergonomic cable with urethane handle helps mitigate fatigue and injuries
- Resistant to aircraft fuels, oils, and lubricants
- **Sold as a single chock**

## Description

---

Checkers 20" Hi Viz Aircraft Chock for Large to Oversized Aircraft with Locking Rope and Polyurethane Cable Handle, Green - AC6820-LR-CHFLG is engineered with precision and an unwavering commitment to safety in the aviation industry. Measuring 8-in W x 20-in L x 5.75-in H, it's designed for use on large to oversized aircraft, ensuring the safety of aircraft, operators, and ground personnel alike. Constructed from hi-viz urethane and highlighted with a distinctive green color, this bright green chock is designed to meet the most stringent safety and performance standards.

The fluorescent green coloring was created specially for situations requiring high visibility, using SafeRay™ Technology that provides the best day and night visibility. It features a UV reflective pigment that is added to the urethane blend during production to ensure visibility even in low-light or nighttime applications.

# Lightweight and Durable Hi Viz Aircraft Chocks

The safety of ramp personnel is non-negotiable. Traditional heavy rubber chocks have been the cause of unnecessary injuries, including head lacerations and shoulder injuries, and their low visibility at night has led to dangerous incidents involving both machinery and personnel. Recognizing these significant pain points, our hi-viz aircraft wheel chocks are lightweight and easy to handle, mitigating fatigue and injuries while ensuring that they are clearly visible in both daytime and nighttime operations.

Featuring a cable loop and urethane handle that last the lifetime of the chock body, our hi-viz urethane wheel chocks typically last longer than rubber wheel chocks. The ergonomic design includes an extended cable with a polyurethane handle, preventing the user from having to bend down to place, remove, or carry the chock, further mitigating fatigue and injuries.

## Compliance and Quality Assurance

Adhering to the most stringent standards, our high-visibility aircraft wheel chocks meet FOD (foreign object debris) precautions, Mil-Spec M-32058-1-2-A (AC6820) and M-32058-1-1-A (AC4614) for specific models, SAE AIR4905 guidelines, and FAA and IATA audit standards. Proudly manufactured in the USA, these chocks come with a 1-year warranty against manufacturer defects.

## Specifications

Model No	AC6820-LR-CHFLG
UPC	812958001493
Color	Lime Green
Pallet Quantity	100
Length (Inches)	20
Width (Inches)	8
Height (Inches)	5.75
Lanyard Length	36"
Sold As	Single
